

Henri Linke

I design and industrialize AI and automation tools that deliver **lasting productivity gains** for teams — **owning everything from spec to production**.

IMPACT & KEY ACHIEVEMENTS

Smart documentation & RAG chatbot **Reduced support load**

KerAwen • 2025-2026 used daily by clients
Automatic Notion → public portal sync + RAG assistant citing its sources (Qdrant, OpenAI), from design to production.
Result: lighter support load, documentation always up to date and AI-ready.

Multi-store inventory SaaS application **Major client signed**

KerAwen • 2026
SaaS application (Django, PostgreSQL) scoped and shipped to production under a tight deadline: multi-company support, roles & permissions, automated tests.
Result: the application closed the deal with a major client.

E-commerce test automation **Regulatory certification**

KerAwen • 2025-2026
Automated functional tests for the PrestaShop point-of-sale module (Python, Playwright): reproducible proof of compliance.
Result: direct contribution to obtaining NF525, the French regulatory certification for POS software.

PROFESSIONAL EXPERIENCE

AI & Innovation Engineer — KerAwen Mar 2025 – present

- Designed and deployed production AI tools (RAG assistant, documentation generation).
- Introduced AI-assisted development: tooling choices, agents connected to internal tools via MCP.
- Industrialization: automated testing, CI/CD, software quality; cross-functional role in technology choices.

Big Data Developer — Capgemini (apprenticeship) 2021 – 2023

- Built pipelines for collecting, analyzing and reporting agricultural data (Spark, NiFi, HDFS) — French Agency for Services and Payments.
- Automated data quality controls; agile delivery with CI/CD pipelines.

Personal project — Multi-agent investment analysis

- 4 specialized agents orchestrated with LangGraph, producing automated financial analyses (VaR, Sharpe, drawdown).

WHAT I BRING TO A TEAM

- Practical, maintainable AI solutions, from POC to production.
- Industrialization: automated tests, CI/CD, software quality.
- Advisory & scoping: perimeter, tech choices, AI only where it truly helps.

TECHNOLOGIES & METHODS

- Python Django FastAPI
- LangChain / LangGraph
- RAG / MCP / AI APIs
- Playwright / Pytest
- PostgreSQL / Redis / Qdrant
- Docker GitHub Actions
- Linux VPS / Coolify
- Spark / HDFS Bash

EDUCATION

AI Engineering degree (Master's level, RNCP 7) — CentraleSupélec / OpenClassrooms (2021-2024)
BSc Mathematics & CS applied to Social Sciences — University of Western Brittany (2019-2020)
Intensive preparatory program in mathematics & physics (CPGE) — Brest (2015-2018)

LANGUAGES

French — native
English — professional working proficiency (B2)
